BIOTECHNOLOGY & BIODESIGN

WHY MYCELIUM DECORATION?

Mycelium biocomposite decorative products combine nature-inspired aesthetics with a sustainable production approach.

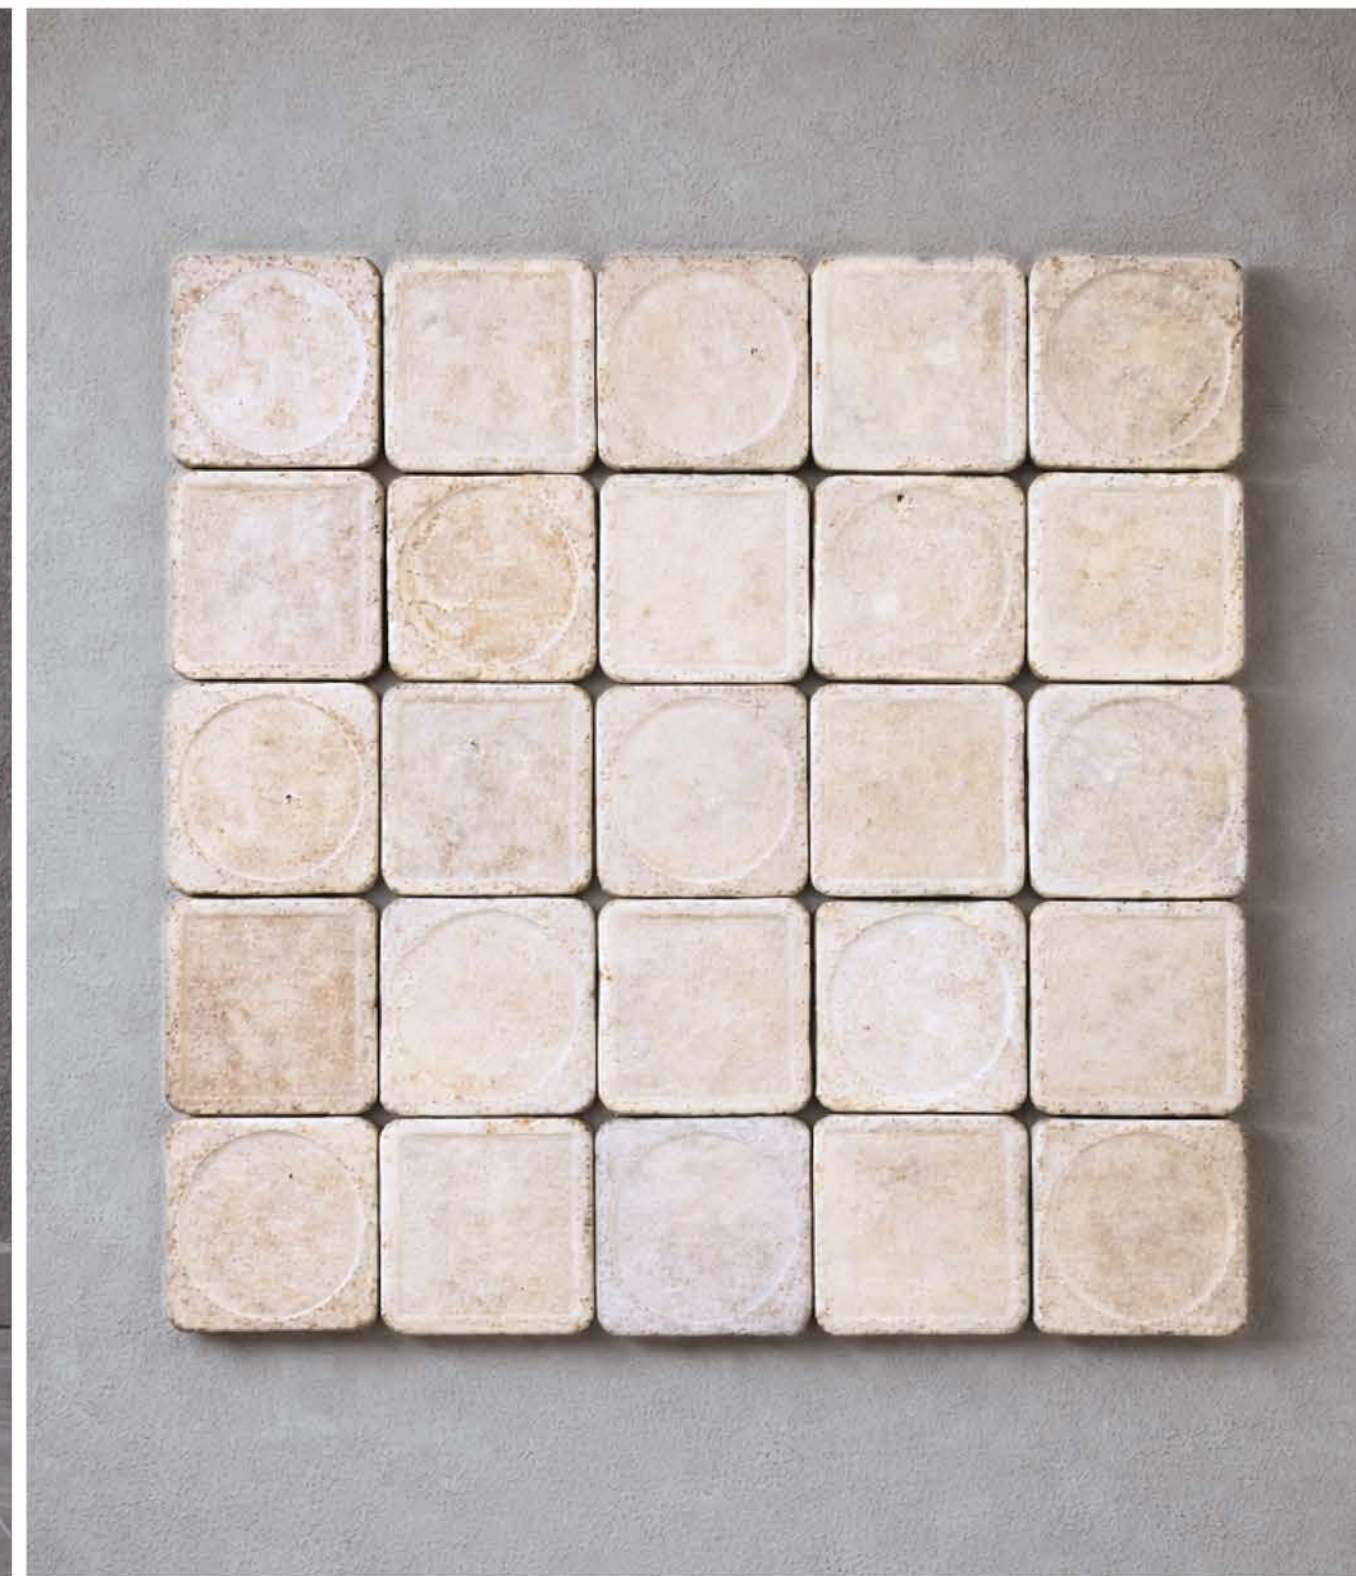

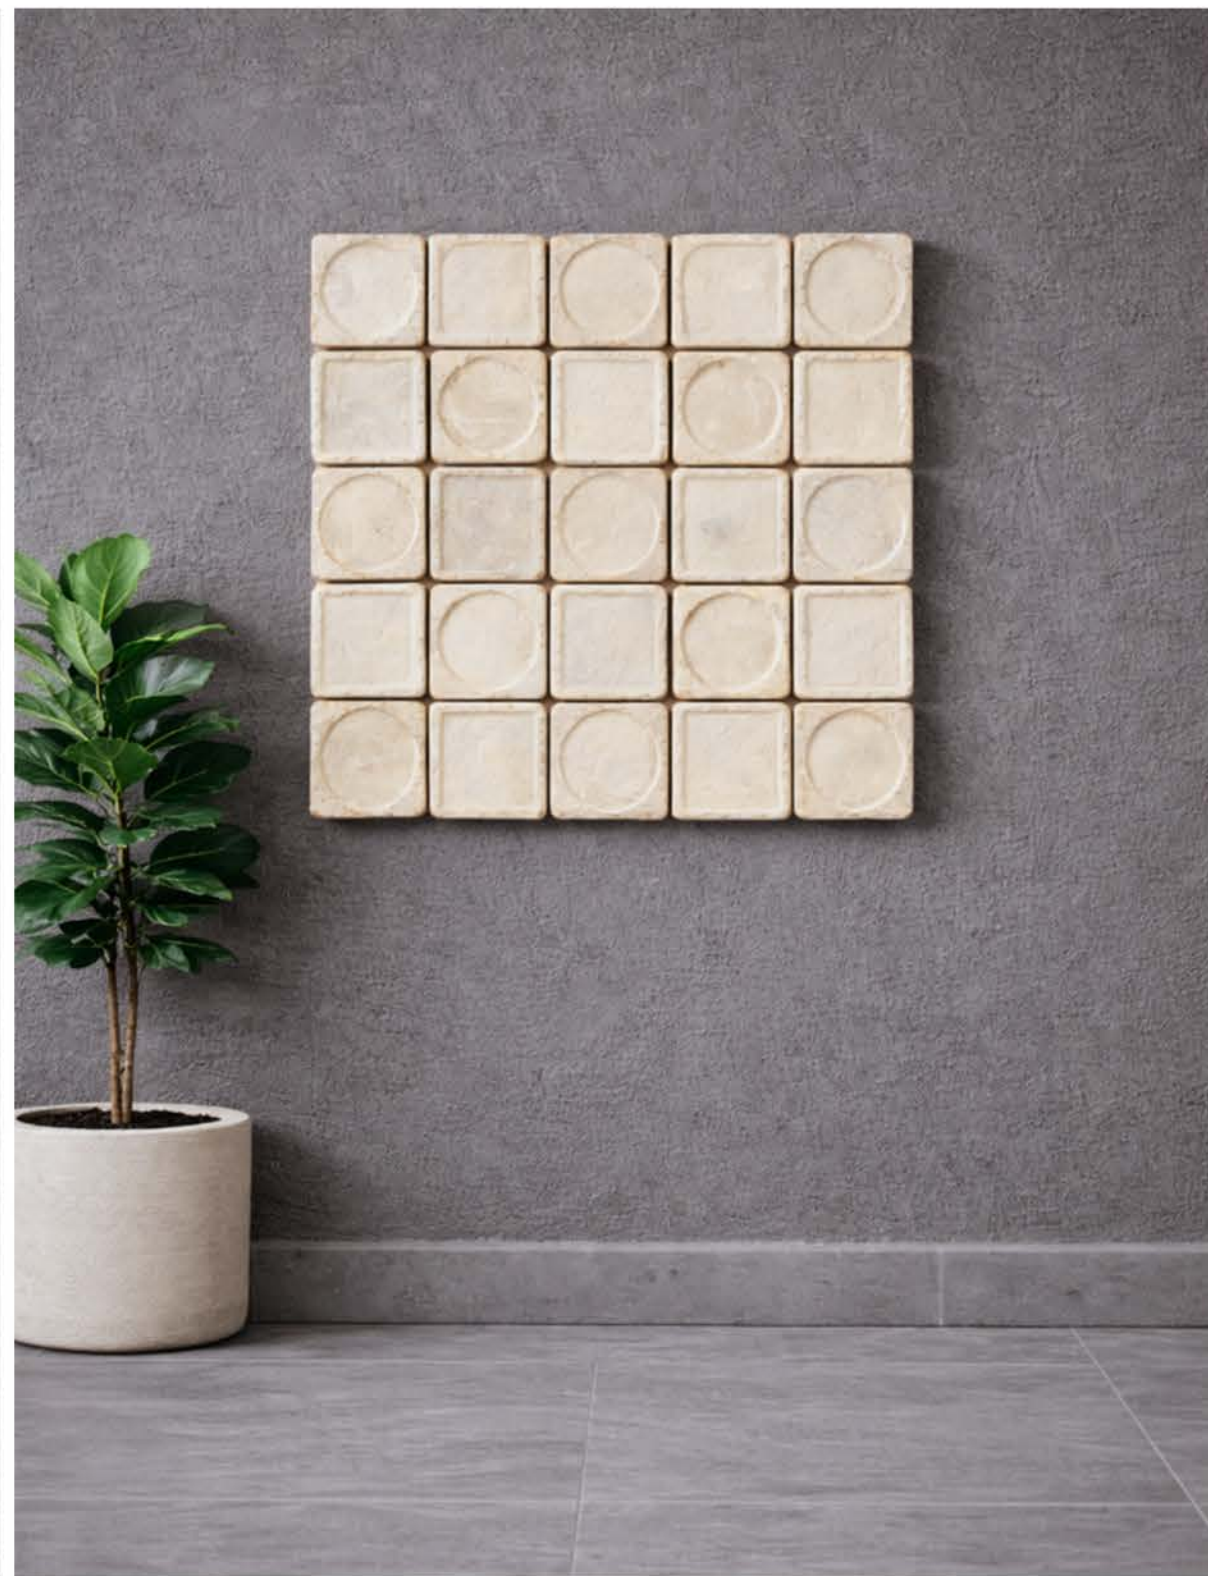

Produced by transforming agricultural waste with mycelium, this unique material is lightweight, durable, and naturally textured—bringing a distinctive character to interior spaces.

At BIOP, our mycelium-based decorative products offer a low carbon footprint thanks to their environmentally friendly structure, while creating a natural atmosphere in living spaces. Each piece delivers a unique design experience with its organic surface and one-of-a-kind texture.
